Effective January 1, 2010, ALL Meet Announcements MUST Include the Depths of the pool, in which the meet is being held, from distances of One (1) Meter and Five (5) Meters from BOTH ends of the pool. The Start and Turn Ends must be indicated in the measurements. We cannot post any meet information until these measurements are included in the announcements.

If the pool has a movable bulkhead, such as RPI and the pool can be set up for starts at either end, we need to have both sets of measurements from the bulkhead, when it is set in the turn position.

This table has been set up as a record of the depths of pools in which AD teams host meets and will be referred to for all future meets.
